

Precession Cardiac MRI Solution

Analysis Tools. Advanced Reporting. Anytime, Anywhere.

Precession Options & Modules

- > Structured CMR Reporting Module with EMR Link
- > ADT/Orders Integration with EMR Systems via HL7
- > DICOM Management with Prefetching/Auto-Routing/Watermarking
- > Optional High Availability Configuration
- > Clinical Trials Management through CloudCMR
- > Study Collection/Categorization
- > Active Directory Integration
- > Statistics and Admin Module
- > Fully HIPAA Compliant
- > FDA 510k and CE Approvals

Cutting-edge technology that delivers everything you need to optimize your cardiac magnetic resonance imaging (CMRI) workflow

Precession combines zero-footprint web technology along with communication and distribution features unmatched in the industry. CMR professionals get a single solution capable of managing all the critical functions of a successful CMR program.

Overview

Precession has embraced recent improvements in web technology to dramatically improve the daily workflow of CMR professionals.

Complete CMR Platform

The days of needing a workstation, plus a reporting system, plus a distribution method are gone. Precession has all of the analytical tools, interpretation, and distribution capabilities a CMR program needs to be successful. Precession CMR Workstation Tools include:

- > Automatic Ejection Fraction/Mass
- > Myocardial Infarct Size
- > Myocardial Perfusion
- > Blood Flow Velocity
- > Multi-Planar Reconstruction
- > T2* Quantification
- > T1 and ECV Quantification

Structured Reporting

The Precession CMR Reporting Solution provides detailed structured reports designed to streamline the efficiency of reading CMR imaging procedures. All fields within the report can be mined for research.

Help Build Your Program

Access and distribution have never been easier. With automated email notifications, Precession can deliver images and reports to referring physicians, solidifying relationships throughout your entire medical community.

No License Fees

Set up new users at no additional charge. Precession doesn't have concurrent user restrictions or any other user license requirements, allowing you to grant access to data to anyone in your medical community who needs access.

Real-Time Collaboration

It's never been easier to review cases with colleagues. With Precession, geographically separated users can login and interact with each other while examining imaging procedures. Navigate studies series by series and illustrate findings on each other's desktops.

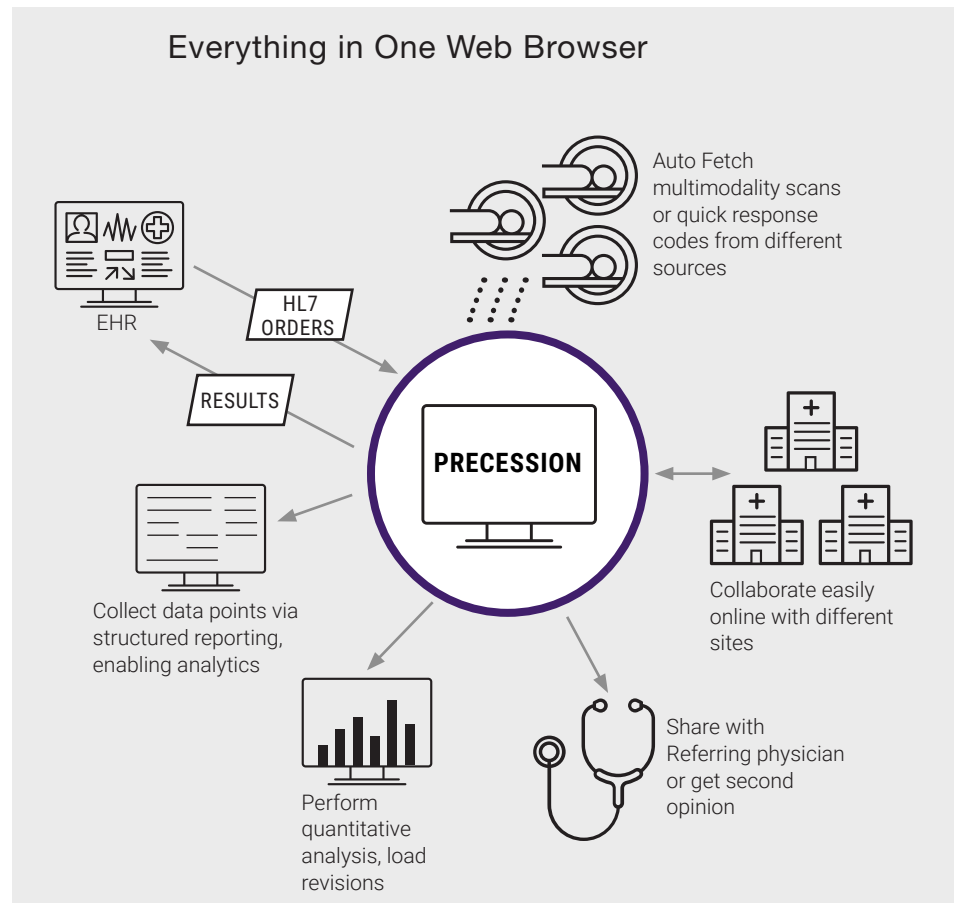

Web Access from Anywhere

IT Department have your systems locked down tight? No problem. Precession is already an easy-to-use web-based solution, but by combining Precession with CloudCMR, you can securely transmit de-identified data to the cloud enabling outside referrers or colleagues to access images.

CloudCMR Integration

Now de-identified data and reports can be transmitted to a publicly accessible location in the cloud. Firewalls and IT departments will not impede communication and collaboration with other professionals.
