

## One of Michigan's Largest Health Systems Selects Intelrad as Enterprise Imaging Provider

*A top 50 U.S. hospital system signed a multi-year, \$50 million contract to leverage Intelrad's enterprise imaging solutions, delivering best-in-class technology to improve patient care across 22 hospitals.*

**Raleigh, NC – November 27, 2023** – [Intelrad Medical Systems™](#), a global leader in medical imaging software solutions, announced a new partnership with one of Michigan's largest health systems, providing care across 22 hospitals and over 300 outpatient and post-acute care facilities. The health system signed a multi-year agreement for \$50 million with Intelrad and will integrate the company's IntelePACS™, Clario SmartWorklist™, cloud-enabled Vendor Neutral Archive (VNA), and image exchange solutions system-wide to empower more than 11,500 healthcare providers to continuously innovate and improve patient care.

"We are humbled to have the opportunity to help one of America's leading health systems transform healthcare in America's tenth largest state," said [Morris Panner, president, Intelrad](#). "We are committed to continuing to invest in and innovate our enterprise imaging solutions to empower our partners to improve outcomes for hundreds of thousands of patients."

Following a transformational deal that built a powerhouse of over 60,000 employees, Intelrad's new client is committed to following through with its vision to transform health. The need for a unified system across the board that offered technology at the forefront of the industry was a must, allowing Intelrad's enterprise imaging solutions to check all the boxes. The suite not only enables hospitals to engage healthcare providers and their communities but also eliminates silos and drives efficiencies that large health systems require to operate at maximum potential.

"Our work at Intelrad has been leading up to this very moment," said Panner. "Over the past several years, we have built on our heritage as a leading system for ambulatory radiology groups and become the system of choice for large-scale hospital systems. The unique combination of high-velocity reading, cloud-first capability, and interoperability with other information systems sets us apart. We share an enormous responsibility to support some of the largest healthcare systems in the world that provide life-saving treatments for countless patients every day."

The Radiological Society of North America (RSNA) is hosting its annual meeting on November 26 through 29, in Chicago, Illinois. At this event, the Intelrad team will showcase its suite of interoperable, enterprise solutions that drive efficiency gains for providers in the hospital market, and the patients they serve.
