

Densitas and Intelerad Forge Strategic Partnership to Advance Breast Cancer Screening with Innovative AI Technology

This partnership strengthens clinical decision-making, increases operational efficiencies, reduces costs, and improves mammography quality and mammography facility adherence with MQSA EQUIP standards.

Raleigh, NC and HALIFAX, NS, October 17, 2023 – [Densitas®](#), a global leader in artificial intelligence solutions for breast cancer screening, announced a strategic partnership with [Intelerad Medical Systems®](#), a leading provider of medical imaging software and services. This partnership strengthens clinical decision-making, increases operational efficiencies, reduces costs, and improves mammography quality and mammography facility adherence with MQSA EQUIP standards.

“We are excited about this strategic alliance that will instantaneously expand the reach of our IntelliMammo® AI platform, extending it to 2,500 healthcare organizations that form Intelerad’s install base. IntelliMammo® is the nervous system of the breast imaging enterprise. Our advanced [AI solutions for mammography](#) inject intelligence and insights into the clinical, administrative, and service delivery needs of [breast cancer screening](#) providers,” said [Mo Abdolell](#), CEO of Densitas.

Densitas IntelliMammo® will provide actionable information to clinical care teams, managers, and administrators when and where it is needed by leveraging the international scale of Intelerad’s IntelePACS® diagnostic imaging and PenRad® breast imaging reporting systems. This partnership will deliver a unique end-to-end solution for breast imaging facilities.

“We are thrilled to announce our strategic partnership with Densitas® to offer IntelliMammo® to healthcare providers, equipping them with sophisticated decision-making support and superior mammography quality improvement solutions,” said [Morris Panter](#), President of Intelerad. “We are committed to supplying our customers with best-in-class solutions that not only ensure top-quality patient care but also enhance workflow efficiency. The introduction of IntelliMammo® alongside our existing PenRad® breast imaging reporting system reinforces our strategic focus on women’s health.”

IntelliMammo® is a mammography enterprise software platform that comprises AI engines that generate breast density, mammography positioning quality, and breast cancer risk assessments that support enhanced workflows and continuous mammography quality improvement. Actionable insights from advanced analytics support better patient care, increased operational efficiencies, and strengthened compliance with FDA MQSA EQUIP and American College of Radiology (ACR) standards for mammography facilities.

IntelliMammo® densityAI™ is a deep learning algorithm that generates standardized and automated breast density assessments from mammograms that align with the ACR BI-RADS® breast tissue composition density scale.

IntelliMammo® IntelliPGMI™ is an AI-based mammography positioning quality score that provides standardized and automated quality assessments of mammograms.

intelerad

intelliMammo® riskVue™ delivers breast cancer risk assessments from select breast cancer risk models.

About Densitas:

Densitas is a global leader in artificial intelligence solutions for breast cancer screening, focused on quality, safety, efficiency, and precision breast health. intelliMammo® supports hospitals and imaging centers delivering mammography services to improve efficiencies, meet FDA/ACR compliance requirements, and support early breast cancer detection and treatment.
