

Clario SmartWorklist™

A smarter worklist to unify the enterprise

Rely on a single source for all of your organization's patient data

Clario SmartWorklist is a vendor-neutral, zero-footprint solution that consolidates worklist priorities across the enterprise. Ensure the right provider is presented with the right case at the right time, regardless of the complexity or disparate nature of your environment.

Clario SmartWorklist's unique infrastructure optimizes workflows between your teams with customizable rule-based logic and application integration capabilities. Highly adaptable and intuitive, SmartWorklist automates your team's reading workflows by accounting for even the most nuanced irregularities within your everyday schedule, all while simplifying user workflows through a singular, comprehensive access point.

Solution Benefits

Support for multiple viewers for streamlined access to separate image repositories

- **Auto-next reading mode:** Presents radiologists with the most appropriate examination, without the disruption of having to return to the worklist
- **Automatic examination distribution:** Fed by real-time availability through in-app rules customization, including:
 - » Subspecialty definition
 - » Service-level agreement rules
 - » Exam assignment and load-balancing rules
 - » And shift-driven rules
- **Integrates with multiple solutions:** Launch multiple PACS viewers, EMRs, Voice Recognition systems, and clinical applications
 - » Clario SmartWorklist integrates with all industry-standard Voice Recognition systems
 - » Seamless integration with scheduling applications such as QGENDA
 - » Connect to multiple EMRs through FHIR interfaces to get updated patient demographics and key exam information.
- **Enable AI:** Augment Clario SmartWorklist with actionable data through a vendor-neutral interface, integrating with any AI algorithm to best support your organization's workflow needs and desired outcomes.

Key Features

Launch over 50 applications through highly tailored and dynamic worklists

- **Linqed Workflow:** Share worklists with other workflow systems for over-read services and operations support
- **Monitor output standards:** Access real-time, in-app productivity tracking and quality metrics
- **Collaborate with ease:** Integrate peer reads, preliminary reporting, and resident-attending worklists
 - » Communicate with radiologists and radiology support staff via in-app instant messaging
- **Exam Protocols:** Modernize exam protocols and avoid workflow disturbance with Clario SmartWorklist's new automated solution.
 - » Generate digital versions of exam protocols which automatically appear as a new worklist item for radiologists' in their queues.
 - » Once the radiologist has verified the protocol, it is sent back through the EMR for the technologist to review.
 - » Create a more efficient, minimally disruptive process for all members of your team.

Smarter Together: Combine the core Intelrad solutions to experience an augmented workflow that leverages Clario SmartWorklist's extensive integration capabilities with IntelOne's ability to consolidate cross-enterprise workflows.
