

# Intelerad IntelePACS

A highly-scalable solution that increases workflow efficiency to drive quality patient care

IntelePACS provides a high performing, scalable data management solution that optimizes data management across multiple environments and securely stores and shares electronic images and patient records. It provides quick and easy access to patient information, improving the quality of care while reducing workload.

## SIMPLICITY

Retrieve and route medical images quickly and easily:

- Speed up the delivery of images and priors to users
- Ensure image and data integrity
- Deliver a highly scalable PACS across a distributed environment

## INTEGRATION

Seamlessly integrate with third-party solutions:

- VNA, PACS, dictation systems, radiology information systems, and electronic medical records
- Enable better subspecialist utilization
- Access patient records across disparate databases

## COLLABORATION

Access an intuitive and powerful universal diagnostic viewer:

- Improve collaboration among colleagues and specialties
- Optimized for remote reading
- Customize reading and reporting workflows for each user

## THE INTELERAD CLOUD PLATFORM

- Improve productivity, security, and agility
- Provide on-premise image reception and compression, optimizing viewing performance
- Easily access infrequently used data as well as copies for disaster recovery

# IntelePACS: A key pillar of the Inteleraad Enterprise Imaging and Informatics Suite

Combine powerful tools to eliminate data silos and generate the insights needed to deliver better patient care.

### INTELEONE

*Cross-enterprise diagnostic imaging platform*

Connect clinicians to repositories across the imaging ecosystem:

- Create imaging workflows that enable better subspecialist utilization, collaboration, and quality of care in less time
- Easily integrate with the HIS, RIS, EMR, PACS, and VNA systems locally, regionally, or across the country
- Provide radiologists with a single, unified environment

### INTELECONNECT EV

*A universal, intuitive, and feature-rich viewer*

Increase productivity with the high performing InteleConnect EV:

- Enable referring physicians to monitor real-time order status through the patient activity dashboard
- Intelligently auto-filter the most relevant orders and images for clinicians
- Provide physicians with immediate zero-footprint access to images from the patient's full record

### CLARIO SMARTWORKLIST

*Vendor-neutral, zero-footprint worklist*

Create a fully connected, interoperable hub:

- Manage reading workflow by automatically organizing each physician's daily reading tasks
- Incorporate native and third-party AI functionality to decrease turnaround time
- Aggregate disparate systems and locations into a single, actionable worklist

Balance workloads, improve collaboration, and deliver faster patient care.
