

Intelrad Analytics™

Intelligent Workflow Insights

Take Control of Your Organization's Performance

Intelrad Analytics™ provides real-time insight into your business and clinical operations for business managers, clinical leaders, and support staff. Once in-hand, the data can be used to eliminate bottlenecks on the spot, while instituting a culture of continuous improvement.

Available from any location, the solution's role-based dashboards and reports provide actionable insights to help your organization make faster and more informed decisions, while eliminating the need to manually crunch large volumes of data.

At A Glance

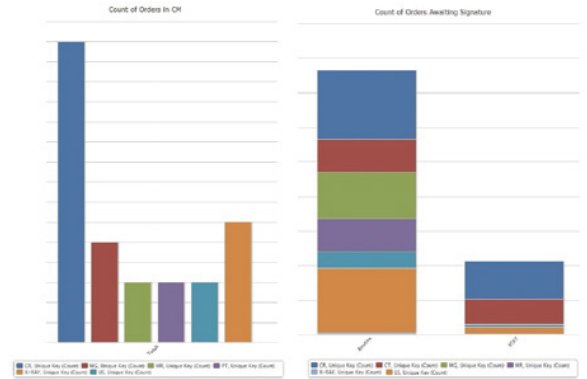

- › Actionable data that enables you to foster productivity and optimize resources, including radiologist utilization
- › Customized dashboards and reports that allow you to pinpoint bottlenecks and institute a culture of continuous improvement
- › Key metrics regarding your practice, including turnaround times, SLA adherence, and RVUs
- › Insight towards elevating practice performance and attracting new business
- › Intelligence regarding your top referrers and their needs

Real-Time Performance Monitoring

- › At-a-glance access to your organization's key performance indicators through configurable role-based dashboards and reports.
- › Visualize your data using a variety of presentation options such as charts, graphs, and tables.
- › Produce more accurate business forecasts.
- › Monitor radiologist and subspecialist utilization and performance.
- › Obtain statistics on your most frequently performed procedures.

Elevate Your Quality Levels

- › Maintain high levels of quality assurance through peer and image quality review scores.
- › Monitor peer review quotas based on modality, specialty and organization.
- › Improve your clinical staff's technical skills through detailed image quality reviews.
- › Understand which areas require added focus in order to institute continuous improvement programs.

organization	2a	2b	3a	3b	4a	4b	Totals
