

AI-Enhanced Clario SmartWorklist™

Your SmartWorklist, Even Smarter

Highly customizable and intuitive, Clario SmartWorklist helps your team skillfully manage diagnostic workflows augmented with clinical AI

Key Benefits:

Add value to your diagnostic workflows through automated prioritization, helping clinicians review cases faster without impeding their professional autonomy.

Cost-effective UI-based rules configuration allows administrators to customize, on-demand, the criteria that qualifies a study to send through available algorithms.

Gradually integrate AI into your diagnostic workflows through a user-friendly interface, giving you further autonomy over the evolution of your tech stack.

AI Prioritization

Clario's AI prioritization showcases AI Status and AI Priority for cases run through third-party algorithms. Directly within the worklist, AI Status displays if a study has yet to be processed through an intended external algorithm while AI Priority flags cases identified with potential positive findings and automatically moves them to the top of the worklist with high priority status for immediate radiologist review.

Clario AI Navigator™

Clario AI Navigator is a fully integrated and automated triage workflow, capable of integrating with virtually any third-party algorithm. This sophisticated AI workflow orchestrator, unlike traditional clinical AI platforms, offers rule-based configuration at the practice-level, giving you complete control over which cases are sent for clinical AI processing. Administrators can build priority configurations from factors such as time of day, TAT thresholds, patient age, end-of-shift verification, and more. As most clinical AI platforms charge a per study fee, AI Navigator cuts the unnecessary cost of running AI on less critical studies that may not meet the algorithm's specifications.

SmartWorklist™ and IntelPACS™: Smarter Together

Optimize your AI-enhanced workflows by integrating your SmartWorklist solution with IntelPACS. Through IntelViewer™, radiologists can leverage different mechanisms to visualize AI findings, including Secondary Captures, to AI widgets, and embedded AI viewers.

About Intelrad

Intelrad is one of the leading providers of software and services for the healthcare industry. Headquartered in Raleigh, NC and Montreal, Intelrad has nearly 700 employees located in offices across six countries. Nearly 2,000 healthcare organizations around the world rely on Intelrad products to manage patient data, helping them reduce time and workload while improving patient outcomes. Intelrad's award-winning enterprise solutions have been recognized by Best in KLAS and Intelrad's Ambra Health ranked #1 for Image Exchange in the 2022 Best in KLAS: Software and Professional Services report. To learn more, visit [intelerad.com](https://www.intelerad.com) and follow Intelrad on LinkedIn and Twitter.
