Intelerad
Critical Results™

AT A GLANCE

• Allows radiologists to flag a result directly in InteleViewer™.
• Features a fully-customizable worklist with configurable due-in-time field, which allows exams to be assigned by urgency level.
• When combined with InteleConnect®, the solution provides real-time notifications which enables care to be delivered in less time. Referring physicians can also use InteleConnect® to acknowledge that critical findings have been received.
• Provides a worklist for radiologist assistants so critical results can be communicated with the referring physician.
• Metrics regarding critical results can be produced using Intelerad Analytics™.

Intelerad’s Critical Results™ solution enhances communication between radiologists and physicians by creating a feedback loop that ensures vital patient information is not overlooked and is communicated in a timely manner.

In terms of performance, Critical Results enables faster, more consistent service levels by providing multi-level alerts, a ‘due-in-time’ field, as well as summary reports.

To ensure the highest level of patient care, the solution allows the radiologist to initiate the critical results communication while continuing the review of the study and generate the comprehensive report.
Critical Results Offers:

**AN EFFICIENT WORKFLOW FOR RADIOLOGISTS**
- Customizable drop-down list makes it easy to identify key findings.
- Findings can be associated to customizable priorities and turnaround time.
- Critical results can be tracked in real time in InteleViewer’s worklist.
- Cases can be assigned to an assistant to monitor and communicate the findings.

**ALLOWS REFERRING PHYSICIANS TO EASILY TRACK RESULTS**
- List of pending critical results for referring physicians.
- Referring physicians are alerted (via email or iOS app) when a critical result is available.
- Using InteleConnectEV, referring physicians can acknowledge that critical results have been received in real time.

**PROVIDES RADIOLOGY ASSISTANTS WITH RAPID ACCESS TO INFORMATION**
- Intuitive, easy-to-use interface provides immediate feedback regarding cases.
- Quick access to all relevant patient information prior to contacting the referring physician.
- Provides an area to add notes in order to close the feedback loop.

**INTEGRATED WORKLIST ALLOWS RADIOLOGISTS TO TRACK THE STATUS OF THE CRITICAL RESULTS IN REAL TIME IN InteleViewer.**

**REFFERING PHYSICIANS CAN ACCESS A LIST OF PENDING CRITICAL RESULTS IN InteleConnectEV.**

**CRITICAL RESULTS CAN BE ASSIGNED TO AN ASSISTANT TO MONITOR AND COMMUNICATE THE FINDINGS.**

**ENSURES THAT THE RIGHT PEOPLE ARE PROVIDED THE INFORMATION**
- Access to critical results can be restricted by organization.
- Assistants are provided critical results worklists by organization.
- Departments’ customizable critical results worklists can be viewed via InteleConnectEV.
