

# Inteleraad Digital Worksheets

Structured Worksheets. Natural Reports.

POWERED BY KAILO SONOREVIEW

## KEY BENEFITS

- Natural-language structured reports built with contextually-aware data.
- Greatly improve turnaround times while simultaneously increasing the accuracy of final reports.
- Enable measurement reliability and report consistency all the way from the modality to the report.
- Fully customizable report templates and sonographer worksheets.
- Review and markup worksheet images with an intuitive and unique touch-screen interface.
- Perfect companion for Inteleraad Multi-Method Reporting.
- Improved report accuracy as ultrasound measurement information is automatically populated directly into the worksheet and final report.

The Inteleraad Digital Worksheets module is a feature-rich, all-encompassing electronic worksheet and structured reporting package that provides the ability to review and mark-up worksheet images with the optional power of a touch-screen drawing surface.

Optimize reading efficiency by automating an accurate flow of clinical information from image acquisition to final report and eliminate the need for paper with digital worksheet data that is automatically transposed into structured reports driven by fully-customizable templates.

## KEY FEATURES

- Sonographers worklist with powerful filtering and image tagging capabilities
- Seamless access to relevant priors
- Fully-customizable digital worksheet and structured report templates
- Optional touch-driven interface to mark up drawings
- Completed worksheets can be sent directly to IntelePACS as a new series
- Embedded viewer for image review
- Seamless integration with Inteleraad Multi-Method Reporting (MMR) and PowerScribe 360 dictation systems

# SonoReview Offers:

## OPTIMIZE READING EFFICIENCY

- Worksheet data that is automatically transposed into a structured report.
- Structured reporting to enable clarity, conciseness, and consistency.
- Single software and workstation solution for sonographers.
- Completely customizable report templates and sonographer worksheets.
- Worklist for sonographers with the ability to start / complete exams.
- Automatically populate the radiologist's final report with electronic worksheet data when combined with Intelerad Multi-Method Reporting™.
- Avoiding potential error from manual text entry and resulting in fewer amendments.

## IMPROVE CLINICAL OUTCOMES

- Improved report accuracy as ultrasound measurement information is automatically populated directly into the worksheet and final report.
- Standardized anatomy diagrams for markup are included with final worksheet.
- Automated clinical indicators.
- Natural language reports with full integration to Intelerad Multi-Method Reporting.
- Access for referring doctors to sonographer worksheets when using IntelConnect® EV.

## INCREASE BUSINESS PERFORMANCE

- Time savings of up to 50% for various ultrasound studies for both sonographer and radiologist.
- Eliminates the need for paper, allowing sonographers to work in a more efficient, paperless environment.
- Feature-rich software module suited for musculoskeletal, small parts, vascular, echocardiography, abdominal, obstetrics and gynaecology.
- Seamless integration with IntelPACS® and any HL7-compliant RIS.
